Atlantis Trading Company

(Exports & Imports)

Atlantis Trading Co.
(Exports & Imports)

Atlantis Trading Co. founded in 2010 is a proud member of Federation of Indian Export Organization (FIEO), reputed global exporting company, Headquartered in Palakkad, Kerala, India having its offices in Kenya and Maldives.

We are renowned for facilitating, trading partnerships between our prominent customers in Africa, Jordan, Maldives, and GCC countries.

Atlantis Trading Co. has established its network of exporting and importing goods and services that are suitable for industrial applications, construction & building materials, safety products, and structural towers.

Our range of exporting product portfolio includes solar deep cycle tubular batteries for solar applications and inverters, building materials like scaffolding accessories, precision balances, ceramic tiles, vitrified tiles, granite slabs, granite slabs for projects, electric fencing equipment, industrial safety products, steel sheets /plates and Valves, GPS integrated Speed Limiters and Structural towers.

HR Steel Plate & Strip and Valves for Gas Cylinders

Atlantis Trading has the business partnership and marketing rights with multiple world renowned steel manufacturers in India and China for the following products

•SG 295 AND S235 JR steel plate/sheet

•Valves and Valve Boss

We offer SG 295 steel plate/sheet for gas cylinders and gas vessels in various sizes.

SG295 steel is a structural hot Rolled steel in the form of plates, sheets & strips for general gas cylinder applications. SG295 is a material grade and designation defined in JIS G 3116 standard. JIS G 3116 is a Japanese material standard for hot Rolled steel plates, sheets, strips for general gas cylinder usage. SG295 has greater elastic region & tensile strength as compare to SG 255 Steel .

Product Gallery

Steel Sheets /Plates

We undertake large trading business for SG 295 steel plate/sheet, S235 JR steel plate/sheet

Valves & Valve Boss

We supply Valves and Valve Boss which are the integral parts for LPG Cylinder.

LPG Cylinder Bung (Valve Boss) is the most important part of an LPG Cylinder.

- NGT THREADS,
- DIN 477 THREADS,
- ISO THREADS,
- M22 x 1.25 [for 3 & 6 kgs Cylinder],
- 25.4 mm x Taper 1:8 [for Refrigerant Gas Cylinder].

Products perform the (JIS 3116 Steel plate and strip for high pressure gas container) standard.

The chemical composition and mechanical properties of the product fully meet the standard requirements.

The size, shape and allowable difference are more strict than JIS 3116 standard.

The surface quality of the steel plate has been refined, which makes the user's acceptance of the products more operable and provides an important basis for product quality assurance.

Grade		Chemical Composition (Mass Percentage)					
						Strength Of Extension	Elongation
		C	Si ≤	Mn	P ≤	σ_b ≥	δ ≥

With high cleanliness of molten steel , stable quality of billet, small fluctuation of product composition and stable performance, Our strategic alliance company Steel has well received by users since the production of steel for LPG cylinder and the output of 1.8 million tons makes it best of the class in our business segment.

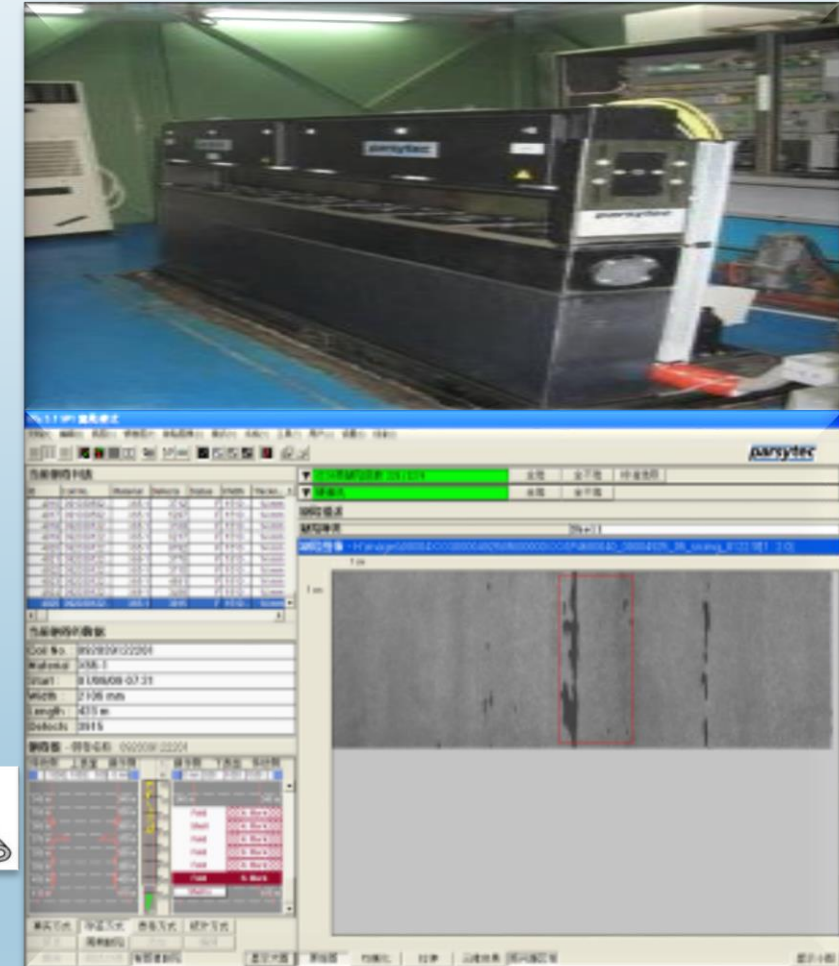

*Dimensional accuracy: with the specification of 3.0*1700mm SG295 as an example, the thickness range is controlled within 0.1mm, 90% of the width range within 0-10mm, the convexity within 50 µm. The product size tolerance control accuracy is high.*

*62 cylinders per ton for 3*1700*Cmm steel coil.*

Our Partner Company's Online PARSYTEC Table Check System

- *The hot rolling and pickling lines are equipped with parsytec online inspection system to realize online detection, monitoring and determination of the surface quality of all hot rolls.*
- *According to the parsytec test situation and order requirements, the surface quality of the hot roll is graded to meet the final needs of the customers.*

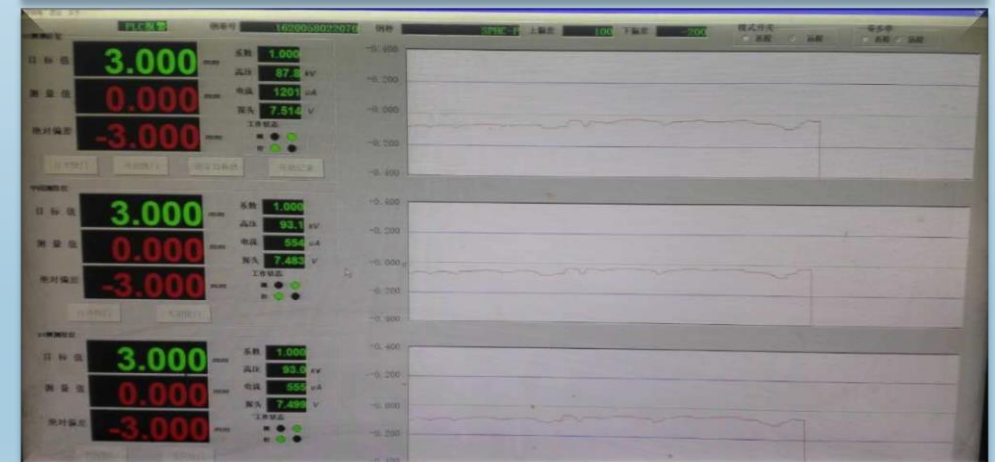

*The pickling line introduces Germany's advanced online edge drop gauge thickness measurement system. The thickness measurement is carried out on the full length of the strip, and three points on the width direction is dynamically measured (the center point and the two sides points which are located at a distance of 40 mm from the edge). **The thickness and precise crown of the strip are ensured.***

Online edge drop gauge thickness measurement system

Thickness control accuracy: except for the strip head and tail, for 99% of the full length, the thickness of more than 3.0mm can be controlled within $\pm 0.15\text{mm}$; For the thickness of less than 3.0 mm, it can be $\pm 0.1\text{mm}$

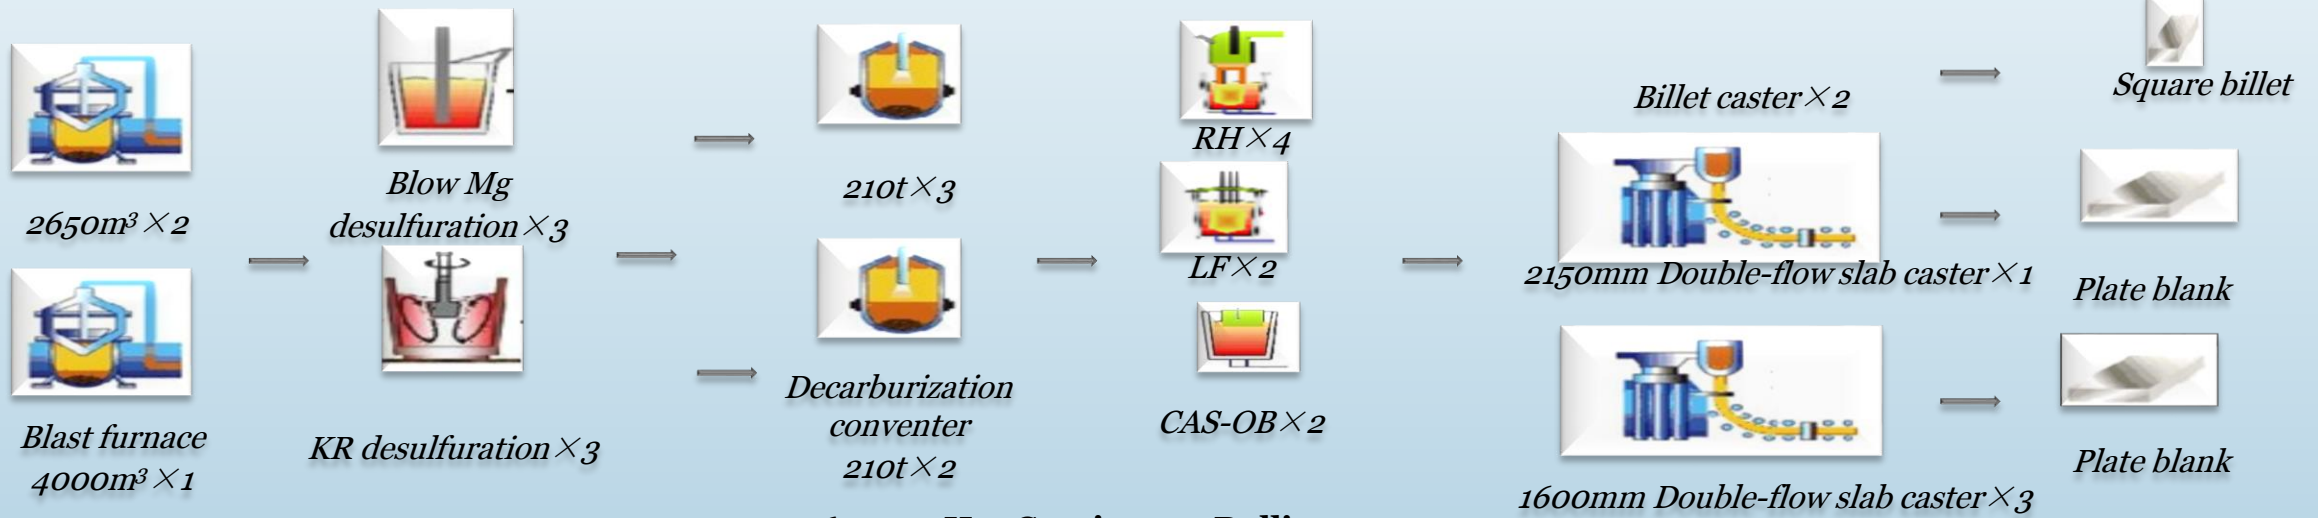

Online edge drop gauge thickness measurement system

Thickness: *Our manufacturing partners have the most advanced laboratory in the domestic metallurgical industry, and has a third-party accredited laboratory that independently undertakes testing. The test data has industry authority and legal effect.*

Mainly including: *There are more than 600 sets of testing equipment, including more than 140 sets of imported equipments. Inductively Coupled Plasma Spectrometer, X-Fluorescence Spectrometer, Direct Reading Spectrometer, American Force Carbon and Sulfur Analyzer, and Fixed Sulfur Analyzer. Hydrogen analyzer and oxygen nitrogen analyzer, German carbon sulfur analyzer, German Zeiss scanning electron microscope(SEM), automatic impact testing machine, automatic tensile testing machine of Instron Company of the United States, German tensile testing machine, fully automatic multi-station Metallographic sample grinding and polishing machine, automatic impact sample processing center, etc.*
