Atlantis Trading Co.
(Exports & Imports)

Atlantis Trading Co. founded in 2010 is a proud member of Federation of Indian Export Organization (FIEO), reputed global exporting company, Headquartered in Palakkad, Kerala, India having its offices in Kenya and Maldives.

We are renowned for facilitating, trading partnerships between our prominent customers in Africa, Jordan, Maldives, and GCC countries.

Atlantis Trading Co. has established its network of exporting and importing goods and services that are suitable for industrial applications, construction & building materials, safety products, and structural towers.

Our range of exporting product portfolio includes solar deep cycle tubular batteries for solar applications and inverters, building materials like scaffolding accessories, precision balances, ceramic tiles, vitrified tiles, granite slabs, granite slabs for projects, electric fencing equipment, industrial safety products, steel sheets /plates and Valves, GPS integrated Speed Limiters and Structural towers.

Atlantis Trading Co.
(Exports & Imports)

Industrial & commercial UPS and battery chargers are so in demand across the world and we, Atlantis trading company, supply them to several countries.

The products we export are customized based on the usage of voltage & current across various countries.

The usage amounts differ from country-to-country, we supply calibrated products to various parts of the world as per specifications.

We have an exclusive marketing rights with manufacturers who comply with the regulations and make the industrial & commercial UPS and battery chargers accordingly.

SINEGATE Series - Industrial UPS Systems

Arabian Power Electronics Company (APEC) is a leading global power electronics manufacturer having worldwide operations with production facilities in Saudi Arabia and India for last 26 years. We are proud of our innovative Research and Development Center in India for continuous development of high-end power electronics technology and future oriented products

APEC is established explicitly to localize the technical know-how and to enable the technology transfer of UPS Systems, Battery Chargers, Frequency Converters, Inverters, Variable Speed Drives System and Solar Power Systems.

A full fledged manufacturing plant in Saudi Arabia of approx. 10000 M² with a sophisticated test facility enables APEC to fully and precisely manufacture and test the entire product ranges. The test facility has both 50 Hz and 60 Hz power supply. The units are manufactured according to IEC standard.

We can also fulfill ANSI/NEMA standard. It must be emphasized that highly experienced engineering team with very profound technical background in the field of power electronics stands behind the success of APEC. This strength allows APEC to offer the best and most optimal in-house customized solutions and designs to customers so as to fulfill their requirements economically.

APEC' s versatile service engineering team ensures on time technical service and support round the clock. We provide complete life cycle management program and spare parts inventory management which is a challenge for many of the customers.

APEC is committed to produce only world-class products that meet or exceed the highest quality standards. APEC has made it one of its imperatives and ethical obligations that quality will never whatsoever be compromised at all times and conditions.

SINEGATE Series - Industrial UPS Systems

SINEGATE Series - Industrial UPS Systems

Sinegate Series is a robust industrial-grade Uninterruptable Power Supply (UPS) system, which is a true online, double conversion UPS designed and built in accordance with IEC standards.

SINEGATE Series incorporates advanced system topology to optimize the system reliability, efficiency and the overall system performance. It features PWM inverter technology, fully rated static transfer switch and high overload and fault clearing capabilities. The UPS system is carefully engineered and built to last and operate flawlessly in the harshest operating conditions for more than 20 years with the minimum requirement of maintenance.

Key Design Features

State-of-the-art-technology

SINEGATE Series UPS systems incorporate IGBT-based PWM technology to reduce harmonic distortion and increase both crest factor tolerance and dynamic stability.

Effective Thermal Management

It is designed with a unique spot cooling thermal management design that qualifies the system to satisfactorily operate at ambient temperature more than 45 C.

State-of-the-art-technology

SINEGATE Series UPS systems incorporate IGBT-based PWM technology to reduce harmonic distortion and increase both crest factor tolerance and dynamic stability.

High Reliability

SINEGATE Series UPS systems are designed for high reliability as components are selected with high de-rating factors to assure maximum MTBF.

SINEGATE Series - Industrial UPS Systems

Long Design Life

Components are carefully selected to provide system that operate at extreme ambient conditions with life expectancy in excess of 20 years.

Durability

Enclosures are industrial grade that are made of firmly welded heavy-gauge steel with an attractive, long-lasting powder textured coating (RAL 7032). Standard cabinets are NEMA 1 (IP 20). Other protection classes and colors are available upon request.

Ease of Access

All components are front accessible; no side or back clearance is required. Internal components and connections are easily accessible and/or removable through the front door.

Ease of Maintenance

Most power and control modules are provided in sub-assembled chassis with plug and socket connection for easy serviceability and minimized spare part inventory.

Low MTTR

Due to the ease of access to internal components and the plug-and-socket subassemblies in addition to the availability of self-diagnostic PCB, SINEGATE is accredited for exceptionally low mean time to repair (MTTR).

SINEGATE Series - Industrial UPS Systems

DIGIGATE Series - Commercial UPS Systems

Floor spacing, advanced communication capabilities, aesthetic view, capacity enhancement through paralleling are some the specific requirements from IT and commercial UPS systems applications. Based on the voice of customers (VOC), our R&D team developed DIGIGATE UPS systems which is suitable for IT and commercial applications.

Key Design Features

Available from 1-1000kVA with various options

Optimized footprint which helps for economic usage of expensive floor spaces

Rack mounted as well as tower type model options available

Smaller capacities are also available with inbuilt batteries

Modular type UPS systems with hot swapping future and scalable up to 500KVA in steps of 50KVA

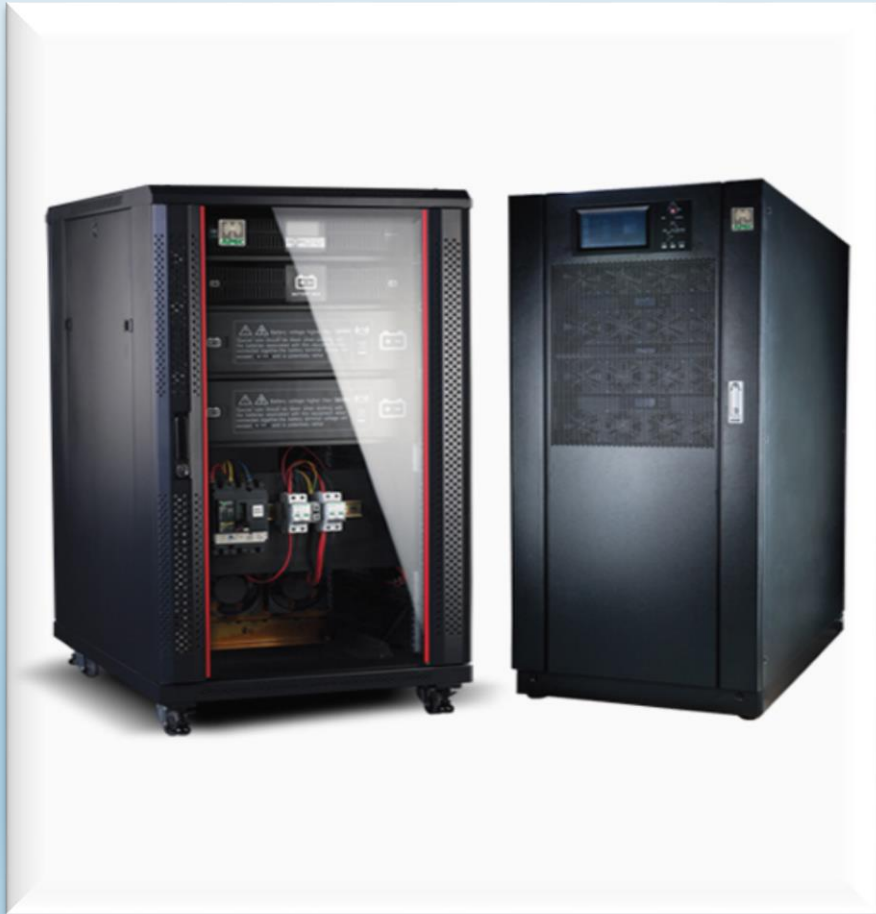

Advanced digital systems with paralleling capability for both redundancy and capacity enhancement.

SNMP & Web Enabled communication capability to meet the customer requirements
